ThistleBond Marine Protective Coatings
– CHEMICAL TANKS

Hycote 175 Ultimate Chemical Protection

ThistleBond Hycote 175 is the ultimate in solvent free epoxy anti corrosive coatings. This unique system prevents permeation and subsequent attack of the coating by highly aggressive chemicals, allowing the system to be used whenever superior chemical resistance is required.

Properties

A two pack solvent free epoxy coating,
Hard wearing and surface tolerant.
Simple and easy to use. Exceptional
Chemical and corrosion resistance.
(Please see chemical chart at the back of
this section).

Surface Preparation

Ideally abrasive blast cleaned metallic
Surface to Swedish standard SA 2 ½
minimum 75 micron profile.

Mixing

Two component material, containing base
And activator.

Application

Applied at temperatures +5C, where
Humidity is below 85%. Can be applied by
Brush or Roller.

Coverage Rate

2.9 sqm per kg at 300 microns Brush/ Roller

Usable Life	Touch Dry	Minimum Overcoating	Maximum Overcoating	Full Cure
30 minutes	4 ½ hours	4 ½ hours	24 hours	7 days
